

DETAIL SPECIFICATIONS

A. Composition:

Sof'Bounce is composed of 100% recycled scrap tire rubber

Particle Size: 3/4" nominal

Steel Content: Product is 99.9% steel free

B. Installation:

Proper site preparation, installation and maintenance are required factors to insure maximum performance of Sof'Bounce.

Site preparation should include removal of any existing fill and vegetation. A border is strongly recommended for containment. Utilizing Sof'Solutions Geo-Textile Fabric is also recommended.

C. Maintenance:

If product requires cleaning, simply rinse product with water. Utilize a power blower to remove leaves and other light weight debris from surface. If slight color fading occurs due to UV rays, simply rake and mix the product to rejuvenate the color.

IMPORTANT: In playground applications, its critically important to level the play area on a regular basis to insure the proper depth is maintained for maximum fall height protection.
